Fernando Faccio, MD
President
Organizing Committee
ALASBIMN 2023

Dear Colleagues and Friends:

We are delighted to be back onsite next year and host the XXIX Congress of the Association of Latin American Societies of Biology and Nuclear Medicine (ALASBIMN).

In this occasion, the congress will take place from 15 to 18 November 2023 at the Hilton Hotel in Buenos Aires, Argentina, guided by the motto “Future of Molecular Imaging - Diagnosis and Treatment”. The congress will cover not only the future in these issues but also it will update and exchange knowledge in all areas of Nuclear Medicine, PET-CT, SPECT/CT, Oncology, Neurology, Cardiology, Radio Pharmacy, and so on.

International and national experts within the field will gather and contribute with their vast scientific knowledge and experience to the four-day congress agenda. This will be a wonderful opportunity to strengthen the exchange of ideas, connect with colleagues, make new connections, and re-discover the pleasure of in-person events.

The XXIII Argentine Congress of the Association of Nuclear Medicine will be taking place within ALASBIMN 2023, which means not only a joint effort from the organizing country: Argentina but also from the entire Latin America region.

We are looking forward to welcoming you in Buenos Aires!

See you in November 2023!

AABYMN 2023

Dear Associates, Colleagues and Friends,

After 3 years of virtual events due to the worldwide known pandemic, I am pleased and proud to announce that we have a great opportunity to meet again and enjoy the XXIII Congress of the Argentine Association of Biology and Nuclear Medicine (AABYMN). This will take place together with the XXIX Congress of the Association Latin American Societies of Biology and Nuclear Medicine (ALASBIMN) from 15 to 18 November 2023 at the Hilton Hotel in the city of Buenos Aires.

In the latest years, our specialty has grown both in hybrid imaging diagnosis and new radioactive tracers as well as in targeted therapies. It is predicted a future of greater growth, which requires permanent updating; and events or congresses of this type offer the possibility to network and interact, not only with the related clinical specialties but also with all those disciplines, which make the development of nuclear medicine possible.

Having that in mind, we have elaborated a large scientific interdisciplinary programme in charge of renowned national and international experts, in an environment of camaraderie and friendship, a common feature in this type of events.

We look forward to welcome our fellow colleagues from Argentina and Latin America in beautiful Buenos Aires!

Warm regards,

Congress Committees

Scientific Content

Scientific Programme Main Topics

NeuroImages

Neurodegenerative Disorders, Neuro-Oncology, Addictions, Dementia.

Cardiology

Multimodality Imaging in Chronic Coronary Syndrome, Measurements of Coronary Flow Reserve, Quantification by SPECT, Infiltrative Pathologies, Inflammation/Infection, New Radiopharmaceuticals, Cardiac Imaging post COVID 19.

Oncology

PET/TC, PET/RM, immunoPET

Hematology

Multiple Myeloma. Lymphoma.

Bone and Joint Pathology

Multidisciplinary Approach

Theragnosis

Prostate Cancer: ^{225}Ac -PSMA 617, ^{177}Lu , ^{223}Ra .

Neuroendocrine Tumour: ^{177}Lu , ^{90}Y . ^{177}Lu vs ^{131}I MIBG.

Metastatic Pheochromocytoma and Paraganglioma.

Combined Treatments. New Radiopharmaceuticals.

Immunotherapy.

Inflammation /infection

Sepsis, Bacteremia, PET/TC in Autoimmune Disease.

Physics

Dosimetry, Artificial Intelligence, Radiomics, PET: reconstruction and correction.

Radiopharmaceutical

Development of new radiopharmaceuticals. Situation in Latin America.

Radio Protection

New challenges with hybrid technology.

Metabolic Therapies.

Technologists

PET/TC to plan radiotherapy. Cardio PET/TC. Artefacts and Pitfalls. Management of Radionuclide Therapies.

VENUE

Hilton Hotel Buenos Aires

Discover one of the most fascinating and avant-garde areas of the city. Hilton Buenos Aires is located in Puerto Madero, surrounded by restaurants and a walking distance from the main tourist attractions and the financial district.
